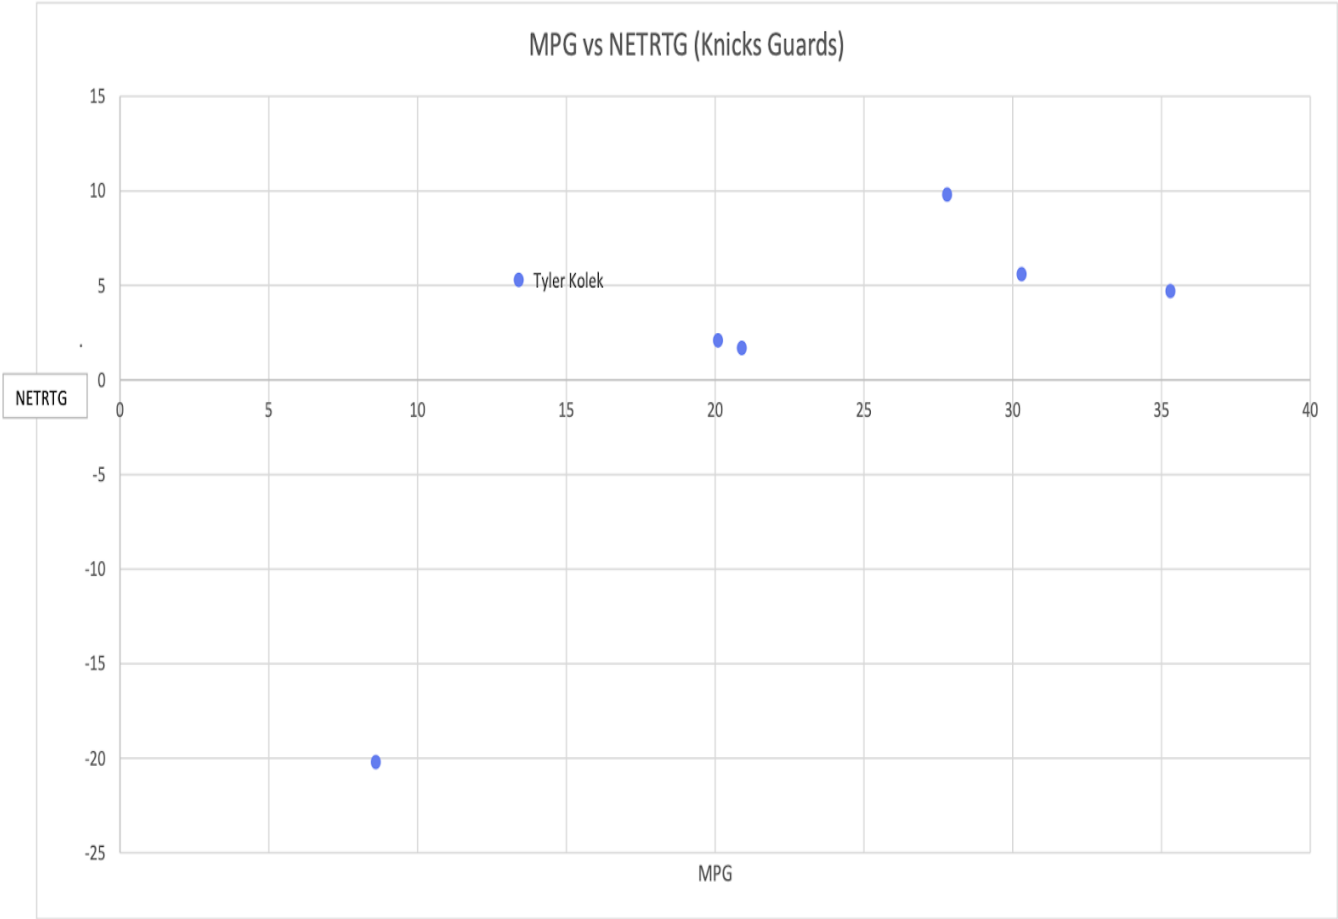
COACHING INSIGHT

Does Tyler Kolek's on-court performance support an increase in playing time?

Player	Minutes	Net Rating
Jalen Brunson	35.3	4.7
Josh Hart	30.3	5.6
Miles McBride	27.8	9.8
Landry Shamet	20.9	1.7
Jordan Clarkson	20.1	2.1
Tyler Kolek	13.4	5.3
Kevin McCullar Jr.	8.6	-20.2



Three Insights

1. **Tyler Kolek shows a positive net rating despite below average minutes compared to the other guards on the team. He has the 7th highest net rating on the team, and 3rd highest amongst the guards. He averages the second lowest minutes per game amongst the guards. This suggests that his on-court impact exceeds what his current role implies.**

2. **There are several guards who are receiving more minutes, but have a lower net rating than Kolek, including their star guard, Jalen Brunson. This could mean that there are inefficiencies in the current rotation and minutes distribution.**

3. **Kolek has a positive impact despite the limited minutes. Typically, it is hard for players to stay in rhythm and have positive contributions when their minutes are limited. If his minutes were to increase, he can have a bigger contribution to the team winning.**

These insights suggest that Tyler Kolek should see a gradual increase in playing time to see if his impact also scales with the bigger role on the team.
